ASPEN FIRE INFORMATION

Update #21

Release for Sunday, August 4, 2013/Time: 7:00 AM

Incident Statics

Acres Burned:	19,882	Structures Threatened:	3
Containment:	65%	Structures Damaged:	0
Fire Start Date:	July 22, 2013	Injuries:	3
Fire Cause:	Lightning	Total Personnel:	1,906
Cost to date:	\$19.3 million		

Summary

- The Fire is located within the Sierra National Forest in Fresno County and is approximately seven miles North of Big Creek. It is currently burning off Stump Springs Road, North of Aspen Springs. The South Central Sierra Interagency Incident Management Team is in command of the Aspen Fire.
- The inversion layer continues to cause smoke to accumulate in the low laying areas of the fire which hampers visibility of firefighters on the ground and in the air.
- Recreation and businesses remain open in the Shaver Lake, Big Creek, Huntington Lake, Lake Thomas Edison, Florence Lake and Mono Hot Springs on the Sierra National Foerst. June Lake, Mammoth Lakes, and Rock Creek areas remain open on the Inyo National Forest.

Fire Update

- Firefighter and public safety remains the highest priority. Fire crews are being sensitive to environmental and cultural resources in and around the fire area.
- Last night, crews strengthened containment lines and continued to make good progress with indirect and direct attack operations. Access and fire behavior are still a major safety concern for fire crews. Ground resources continue to construct and reinforce indirect line around the fires perimeter.
- Resource advisors are working with suppression crews on rehabilitation efforts of fire lines within the fires perimeter.
- Due to the extremely steep, rugged and inaccessible terrain, fire crews are using a tactic called indirect attack which creates control lines away from the fires active edge. Air resources, including several helicopters and air tankers are being utilized along the fire-line to slow the forward progress of the fire and to cool down hot spots. As the situation changes and firefighters can safely gain access to the fire, a more direct attack will be implemented.

(More)

- Smoke from the Aspen Fire continues to impact air quality in local communities. Crews will utilize firing operations over the next three days to assist with enforcing containment lines. Firing operations are actions taken to remove unburned fuels between the active fire line and the contingency lines which fire crews have been creating over the past several days. The operation will put additional smoke into the atmosphere.

An air quality monitoring device has been installed at the Huntington Lake Volunteer Fire Station. The device will provide smoke data from the Aspen Fire to the air resource advisor and the area air pollution control districts.

Individuals sensitive to smoke are advised to remain indoors and keep windows closed to minimize exposure to smoke. For more information regarding smoke visit: www.valleyair.org

Road and Trail Closures

Roads:

Stump Springs Road is closed to all traffic due to fire suppression activity. Minarets Road (4S81) from Fish Creek to Jackass Rock Organization Campground, Grizzly at Beasore Road to Minarets Road are closed to the public. Residents within the road closure are allowed into the area with valid identification.

Trails:

Per the U.S. Forest Service Closure Order Number 15-13-09, all trails within the Kaiser Wilderness are closed.

Closures

Campground closures within the Sierra National Forest are as follows:

Sample Meadow	West Kaiser
Jackass Rock Organization	Lower Chiquito
Little Jackass	Soda Springs
Placer	Sweet Water
China Bar	Rock Creek
Mammoth Pool	Wagners Mammoth Pool Resort
Fish Creek	

The following campgrounds are closed to house firefighters for suppression efforts:

Midge Creek, Badger Flat and Rancheria.
